

To understand a company's capabilities, one must first know its purpose. IT Broadcasting enables knowledge. We inspire positive change.

Each of us gains knowledge every day, through the experiences and interactions that day brings. Simply put, knowledge is an integral part of being human, and access to knowledge is a right inherent to every human being.

IT Broadcasting embraces knowledge, and the positive change it brings. We believe, as human beings, knowledge is how we improve ourselves. Knowledge enables us to make better, more informed choices. Better choices lead to better outcomes. Better outcomes improve individual lives, and ultimately make being human easier, more enjoyable and more fulfilling - in a word, more humane.

IT Broadcasting is a media and metadata company

An early vanguard in streaming media, we are forging the future

Through secure RPA, healthcare advances for all

We are passionate advocates, breaking down barriers in pelvic health literacy
